trips & favourite locations

24*365 Real-time Alarm Monitoring
enabling vehicle intrusion sms/email alerts
to be sent instantaneously to you

Revolutionary Vehicle Alarm with cool tools

Online GPS Monitoring is the ultimate in automotive security, allowing you to find your vehicle in an instant and get reports on speeding, distances, trips and much more via the Web, Email and/or SMS.

Suitable for: **Cars, Motorbikes, Boats, Caravans and Commercial Vehicles**

Conventional Car Alarms **Just Don't Work!**

People ignore car alarm sirens and thieves have developed workarounds to almost all forms of car alarms.

Professional car thieves can have your car disassembled within hours - you cannot rely on conventional security and law enforcement procedures to prevent this.

Protecting your vehicle from theft has become harder and harder - Until NOW!

Ezy2c brings you the most Reliable and Revolutionary Car Alarm on the market. Within second's of your car being broken into – receive an SMS or Email to your mobile phone or PC and you instantly locate and track your vehicle – and instigate Police recovery. Its that easy!

Some Security Facts*

- More than 85,000 motor vehicles are stolen each year – approximately 1 in every 6 minutes!
- 1 in 3 Vehicles stolen last year were never recovered
- Most commonly stolen passenger vehicles brands are Holden, Ford and Toyota
- More than 5000 stolen vehicles are sold to unsuspecting buyers each year
- Vehicle Theft costs Australia around \$1 Billion each year
- The average Australian who has had their vehicle stolen will lose approximately \$5000.00 in unrecouped expenses
- One in every 70 households in Australia is a victim of vehicle theft every year

* From statistics compiled by ABS, NSW Bureau of Crime Statistics, Australian Bureau of Criminology and www.carsafe.com.au
